Training held in Greenfield

Greenfield, Iowa - On May 18th Adair County EMS, Fontanelle Fire Department, Greenfield Fire Department, Orient Fire Department, Bridgewater Fire Department and Greenfield Police Department members participated in a vehicle extrication training. The purpose of the training was to refresh EMS personnel on assessment, care and treatment of a trauma victim involved in a motor vehicle accident. Also for firefighters to refresh the steps of vehicle extrication with a victim inside using the jaws of life. The training included all the above departments, 3 vehicles supplied by Clayton Auto Salvage and Service and 3 volunteer patients. This was a great hands on training with a patient in the vehicle.
